Accelerating the IOT Revolution

Dolphin Mobile Tour Management System

Dolphin RFID has introduced a revolutionary RFID based system for tracking and tracing tour members who are on group tours. As most of the time group members are not conversant with local language/culture it becomes a task to shepherd them and run an efficient tour. The mobile RFID solution by Dolphin gives an option where the baggage of all tour members can also be tracked and traced.

What is RFID technology ?

Radio Frequency identification is an emerging technology which helps automate the existing manual/semi-automated processes. Dolphin RFID is a company which is fully dedicated to providing end-to-end RFID solutions and helping maintain them through the lifecycle. Dolphin RFID systems help integrate varied RFID readers from technology leaders and also integrates with the existing applications (including ERPs) thus making it simple for the end users to assimilate the technology.

Fully Automated RFID Solutions for Mobile Tour Management System

A patented revolutionary Active RFID based Tour Management System from Dolphin helps keep track of multiple tours worldwide from a single server. The Tour Manager works on an Android phone.

Key Features

Guest Auditing Solution

With the help of Active RFID PDA and guest tags, tour operator can in real time conduct Audit/count either on buses or at assembly locations. Dolphin Lite application keeps a complete record of every guest which can be accessed at any time.

Baggage Tracking and Verification Solutions

Dolphin Baggage Tracking solution can help tour operator keep track of baggage carried on the tour. It also makes sorting and delivering baggage to the right rooms very easy. Baggage can very easily be audited before they are loaded on to buses.

People Search and Communication Solution

RFID makes searching faster. In case a guest goes missing from a group, operators will get that missing name from a primary audit list. Missing guests can be put on 'Search Mode' by which operators can locate him/her with the help of handheld device at substantial ranges.

Remote Central for New Groups

Tour Company can update the tours/tour members and location from a central sever thus being able to control the activities of the tour guides in real time.

Dolphin Active PDA

With no time Tour Operators or his/her assistant can find out missing guests from the bus before they start their journey with the help of Dolphin Active PDA.
